

Thank you for purchasing a Jennyruth Workshops **Wren Box**

- It should be fixed using the metal fixing/batten.
- Screw to a wall or fence or strap to a tree to avoid damaging the tree.

- Position your nest box between 3ft and 10ft above ground.
- Wrens prefer a secluded area with plenty of cover.
- The box may be nestled in the branches of a tree or in a location that included nearby bushes.
- Face the box away from prevailing winds and in partial shade.

- Clean your box in October/November
- Avoid using flea powder or pesticides which may be harmful. Use boiling water to kill parasites.
