

Thank you for purchasing a Jennyruth Workshops **Bird Box**

- It should be fixed using the metal fixing/batten.
- Screw to a wall or fence or strap to a tree to avoid damaging the tree.

Tit Boxes

- Position your nest box 2-4 metres off the ground with a clear flight path.
- Face the box between North and East (or in the shade) to avoid strong sunlight and the wettest winds.

Robin Boxes

- Position your nest box less than 2 metres above ground.
- Ensure the box is well hidden by vegetation.

- Clean your box in October/November
- Avoid using flea powder or pesticides which may be harmful. Use boiling water to kill parasites.
